Smart, safe, simple

## RETAINING WALL CAPS

Give your backyard the complete finish

At Capped Solutions, we provide you with durable, UV stabilised, polypropylene caps for your retaining walls. Our wall caps fit new, as well as existing retaining walls. They slide on with ease to hide those imperfections and give the wall that finishing touch. As well as being aesthetically pleasing, our wall caps are a great safety feature to cover those sharp corners. They fill in the gaps and act as a connector to complete each wall.

Our polypropylene caps are considered to be exceptionally tough and are resistant to the harsh Australian climate. Withstanding extreme temperatures of up to 82°C, our retaining wall post caps are sure to endure the Australian summer and maintain their shape and colour.
